PROJECTS

- ❖ [StudyBuddy](#)
A website made using vanilla Django that helps users log in and create rooms and chat within.
- ❖ [Voting Dapp Blockchain](#)
A web app made using solidity, web3.js on Ethereum blockchain to do the whole election process including registering and displaying candidates, registering voters, registering admins, taking votes, and displaying winning candidates all done on blockchain hence makes the voting transparent.
- ❖ [Grocery Bud](#)
A simple website made using vanilla Javascript that helps create a list, adding, removing, and editing values, like a To-Do List.
- ❖ [Menu](#)
A website made to show all menu items and sort them according to the user's needs.

EXPERIENCE

- ❖ Ex- Executive Member of Tech Nexus NIT Hamirpur
Worked on ContactUs and AboutUs page of [fest website](#).
- ❖ Ex-Executive Member of [E-cell](#) NIT Hamirpur
Worked as a Frontend Developer, content writer, and finance manager on my college's entrepreneurship cell team
